CLEAN SHIELD™

100% PLASTIC-FREE!

ULTRA-PREMIUM MATTRESS PROTECTOR

WITH
CRYPTON

Different from any other, Fashion Bed Group® Clean Shield™ Mattress Protector is made with Crypton® Super Fabric. With Crypton®, liquids roll off, stains clean easily, odors won't grab hold, and it's disinfectable.

Integrated moisture barrier enhances the fabric's performance by keeping liquids on the surface, preventing any fluids from reaching the mattress.

Moisture-resistant barrier is breathable, quiet, and comfortable, with no plastic, vinyl, PVC, or other laminated materials.

Advanced technology works to fight stains and easy spot-cleanability extends the lifespan of mattresses.

The EPA recognizes Crypton® Super Fabric as a non-porous surface that can be disinfected when using EPA-approved Crypton® Disinfectant & Deodorizer.

Engineered barrier protects from dust mites and pet allergens, and inhibits the spread of mold, mildew, and bacteria.

Silver ion anti-microbial technology protects against odor-causing bacteria.

Third-party GREENGUARD Gold Certified for low chemical emissions, which promotes healthier indoor environments by improving indoor air quality.

Research and development, chemical formulations, patents, processing, and product assembly are all completed in the USA, supporting American workers.
